

### *A Presidential Message...*

As this year's incoming President, I would like to welcome everyone to our 2021-2022 ASHRAE year. Last year proved to be a great challenge with the global pandemic. I wanted to send a big THANK YOU to Nate Heffner, last year's Chapter President, for his diligence in ensuring we still had monthly meetings and leading our chapter through some rough times. Unfortunately, as I'm sure many of you are aware, the pandemic is far from over and we are seeing an up-tick in new cases driven by the Delta variant of the SARS-CoV-2 virus (COVID-19). We are monitoring this new variant and will send out any pertinent information society publishes to our membership to keep you informed and up-to-date.

Given the up-tick in new cases, this month's meeting will again be a virtual webinar offering continuing education credits. The topic will be on Motor Technologies and Controls, provided by Greg Allen at Greenheck. Greg has been with Greenheck since 2015, wearing the hat of both Engineer and Instructor. Greg spends much of his time teaching at Greenheck's HVAC-University and customer visits, with topics such as Fan Fundamentals, System Effect, Motor Technology and Controls. When Greg is not instructing, he assists the customer service team and Application Engineers. Prior to joining Greenheck, Greg was an Engineering Manager for a nationally recognized test lab. Greg is a member of several professional organizations, such as ASHRAE. Finally, Greg is a Combat Veteran, family man and an avid outdoorsmen.

I hope you all can attend this webinar and I'm looking forward to seeing all of you. Thank you to Air Control Products for providing a speaker for this meeting! We are still in need of 6 more hosts for this year's meetings. If you are interested in hosting a meeting please email me directly.

Respectfully,  
Andrew Moses
